DANI DECLARES

Property Inspection & Photo Log Kit

Document condition clearly. Diagnose nothing

Fillable on screen. Print-ready. Works with the pocket app.

Edition 2 draft | We handle the execution.

Purpose and scope

A visual condition record, not a licensed home inspection

1. Purpose

Decide whether this is condition documentation, a move-in or move-out record, a maintenance follow-up, or turnover readiness. This kit is for visual condition records. It is not a licensed home inspection and does not find hidden or structural problems.

Property or unit

Date and time

Purpose of this inspection

Prepared by

Who authorized entry

2. Room sequence

Exterior and access where permitted; entry; kitchen; baths; bedrooms; living areas; utility areas and visible fixtures; final overview. Record only areas you are authorized to enter.

Room-by-room checklist

Mark each room, then log anything that needs attention

Room or area	Photographed	Condition (neutral words)	Issue logged?
Exterior and access (where permitted)			
Entry			
Kitchen			
Bathrooms			
Bedrooms			
Living areas			
Utility areas and visible fixtures			
Final overview			

3. Photo protocol

Use consistent angles, good light, date and time, location labels and descriptive file names. Avoid people, access codes and private documents. Take a wide shot first, then the detail, with something for scale when helpful.

Condition ratings and photo log

Observable words only. Never guess at hidden conditions

4. Condition ratings

Use neutral, observable words: clean, minor wear, repair needed, inaccessible, not inspected. Never guess at hidden or structural conditions.

Photo ID	Room	Location or fixture	What the photo shows

Issue log

Facts, urgency, referral and who was told

5. Issue log

For each issue capture location, observation, photo ID, urgency, recommended referral and who was notified. Do not diagnose repairs you are not qualified to diagnose. Report active hazards immediately.

Issue ID / room	Observed condition	Photo ID	Urgency	Referral	Notified

Worked example

How one finding is recorded

7. Worked example

The kitchen sink cabinet shows visible water staining. Photograph and label it, log the observation, flag it for qualified maintenance review, and do not conclude a cause.

Field	Example entry
Inspection ID and room	INS-0312, Kitchen
Surface or fixture	Sink base cabinet floor
Observed condition	Visible water staining, about 6 in. area; surface dry at time of inspection
Photo ID	INS-0312_kitchen_sink-cabinet_01.jpg
Urgency and referral	Medium; yes, maintenance review
Notified	Property manager, by email, with date and time
Follow-up and closed	Re-check after the maintenance visit; not closed

Example data

The entries above are an illustration. Replace them with your own.

Closeout and privacy

Build an index, confirm completeness, deliver securely

6. Closeout and privacy

Build an index, confirm completeness, deliver photos securely and follow your retention policy. Report active hazards immediately.

Closeout checklist

- [ ] Every room in the sequence is photographed or marked inaccessible
- [ ] Every issue has a photo ID, urgency and referral
- [ ] No people, codes, documents or private items appear in photos
- [ ] Photos delivered through a secure channel
- [ ] Retention date noted
- [ ] Hazards were reported when found

Delivered to and date

Retention policy and delete-by date

Using the tracker and pocket app

Keep the record consistent across devices

Implementation checklist

- [ ] Duplicate the editable tracker and keep an untouched master copy
- [ ] Replace the example row with your own information
- [ ] Get the approvals your clients and jurisdiction require
- [ ] Review the tracker weekly; archive old versions per your policy
- [ ] The pocket app saves in this browser only: export CSV regularly

Limits

Educational template for independent service operators and households. Adapt it to your own prices, policies, local rules and client requirements. Not legal, tax or financial advice, and not a professional inspection.

Customization

DANI DECLARES LLC offers separately scoped business-setup help. This purchase does not include it.
