DANI DECLARES

7-Day Home Reset Kit

One focused area a day. Twenty to forty minutes.

Fillable on screen. Print-ready. A day-by-day plan, a weekly rhythm and a progress tracker.

Edition 2 | We handle the execution.

How the reset works

Seven days, one area a day, a calmer home at the end

Each day has one focus area, a time target and three short steps: clear, clean, finish. You are not trying to deep clean the whole home. You are resetting what you use every day so it stays easy to keep up.

Ground rules

Set a timer for the time target. When it rings, finish your current task and stop. A stopped reset still counts.
Do the "clear" step first. Surfaces you can see clean faster and stay clean longer.
Never mix cleaning products. Read the label, ventilate, and test a new product on a small hidden spot.
Put things where they live. If something has no home, put it in the "decide" box and choose on Day 6.

Choose your start

- [ ] I picked my seven days (they can be any seven days in a row)
- [ ] I set a daily time slot that I will protect
- [ ] I put the supplies from the next page in one caddy
- [ ] I told the people I live with which area is each day's focus
